DETAILED ACTION

1. Last OA mailed 8/9/06 is hereby incorporated by reference.

Response to Arguments

2. Applicant's arguments filed 11/17/06 have been fully considered but they are not persuasive.

Applicant argues:

- 1.) What structure is Bjelland does the Examiner consider to the claimed intermediate network.

Bjelland teaches that "gateways being able to extend TFO negotiation on the circuit switched legs toward the IP call legs and vice versa.", See col. 6, lines 24-32.

Fig. 4 teaches wireless network coupled to the PSTN via Gateway 140. PSTN is the intermediate network. Furthermore, there is no structure claimed for the intermediate network.

- 2.) Where in Bjelland is it said that the network identified in response to (1) is a circuit switched network and that it carries inband signaling. PSTN is a circuit switched network and the Bjelland teaches that inband signaling (TS 04.53) is incorporated in the telephony exchange, See col. 6, lines 33-39.

- 3.) What networks in Bjelland deos the alleged claimed intermediate network connect. Fig. 4 teaches that the wireless network is connected to the PSTN and the PSTN is connected to IP network to perform end to end negotiation.
